

# Special Issue

## Selected Papers from MATBIM2019

### Message from the Guest Editors

The MATBIM2019 conference will focus on three main themes that are currently hot areas in the field of food and bioproduct packaging materials: (i) mass transfer and food and bioproduct/material interactions, (ii) new trends toward environmentally friendly materials, and (iii) new materials through nanotechnology routes. Within these three main themes, several topics will be discussed during the conference, including transfer phenomena and toxicological/safety assessment, new materials from biomass and downgauging strategies, bottom-up/top-down approaches, and hybrid materials, just to mention a few. *Sci* will publish a selection of papers related to the meeting in the form of regular articles as well as critical reviews and perspectives. Your contribution is very welcome!

Prof. Frédéric Debeaufort

### Author Benefits

#### High Visibility:

indexed within ESCI (Web of Science), Scopus, and other  
databases.

#### Journal Rank:

CiteScore - Q1 (Multidisciplinary)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 36.6 days after  
submission; acceptance to publication is undertaken in 6.8  
days (median values for papers published in this journal in  
the first half of 2025).
