

Special Issue

Geosciences and Astronomy

Message from the Guest Editor

The main goal of this Special Issue, which aims to demonstrate the potential synergy between astronomy and geosciences, is to provide an overview of technologies and methodologies, as well as references to practical applications in many important fields related to knowledge discovery in astro- and geo-science. The purpose is to provide a background and present some ideas and references that could be useful in the design of fully operational data analysis systems and of an experimental data science collection. We invite researchers from all relevant fields to submit their most recent findings for publication in this Special Issue.

Potential topics include, but are not limited to:

- Astronomy and astrophysics;
- Earth observation;
- Acquisition, processing, and visualization in geosciences and astronomy;
- Astrogeoinformatics.

Guest Editor

Prof. Dr. Vladimir Sreckovic

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Claus Jacob
Division of Bioorganic Chemistry, School of Pharmacy, Saarland
University, D-66123 Saarbruecken, Germany

Author Benefits

High Visibility:

indexed within Scopus, and other databases.

Journal Rank:

CiteScore - Q1 (Multidisciplinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 37.1 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the second half of 2024).
