Mediterranean Sea Resources: Sustainable Exploitation, Management and Dissemination

Message from the Guest Editor

The Mediterranean marine ecosystem needs urgent attention and cure. With it being a relevant economic source (blue economy) that brings direct benefits to humans, its sustainable exploitation and management are an important focus of the EU agenda. Goal 14 of Agenda 2030 and its 17 Sustainable Development Goals focuses on “Life Below Water” and steers the promotion of careful management of this essential global resource as a key feature of a sustainable future. The COVID-19 pandemic has shown us how fragile the balance is between nature and human systems. Strengthening this link and preserving biodiversity must be humanity’s goal in the coming years. Dissemination projects to raise awareness of the potential richness coming from the Mediterranean Sea and importance of biodiversity conservation are needed to promote sustainable exploitation of marine natural resources in a healthy ecosystem.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Claus Jacob
Division of Bioorganic Chemistry, School of Pharmacy, Saarland
University, D-66123 Saarbruecken, Germany

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, and other
databases.

Journal Rank:

CiteScore - Q1 (Multidisciplinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 36.6 days after
submission; acceptance to publication is undertaken in 6.8
days (median values for papers published in this journal in
the first half of 2025).
