Green Chemistry

Message from the Guest Editor

This Special Issue on “Green Chemistry” aims to integrate emerging aspects of research development in this area and is focused on presenting the most important examples of more advanced applications and implementations of green chemistry principles. This Special Issue includes, but is not limited to, the following topics:

- Safer processes, materials and chemicals
- Sustainable use of renewable resources
- More Sustainable Energy systems
- Solvent designer
- Green Chemical Synthesis
- Green Engineering
- Process optimization and simulation
- System designed for more sustainable processes
- Methods and tools to measure the sustainability of the process.
