

## Special Issue

# Pharmaceutical Applications of Heterocyclic Compounds

### Message from the Guest Editor

Heterocycles play a central role in organic chemistry and, more importantly, serve as preferred scaffolds in pharmaceutical research. Their unique ability to modulate biological activity explains why the majority of approved drugs contain at least one heterocyclic unit. Beyond therapeutic applications, these structures are also the basis for numerous applications in biology, materials science, optics, and electronics.

This Special Issue invites scientists to submit original communications and papers that describe recent advances in the use of heterocycles in medicinal chemistry and pharmaceutical applications. Our goal is to highlight new approaches and discoveries in the field and explore their potential impacts on future therapeutic applications. Reviews reporting on the relevance of heterocyclic compounds in the pharmaceutical field are also welcome.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Helmut Viernstein  
Division of Pharmaceutical Technology and Biopharmaceutics,  
University of Vienna, Josef-Holaubek-Platz 2, 1090 Vienna, Austria

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Embase,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

CiteScore - Q2 (Pharmaceutical Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 22.8 days after  
submission; acceptance to publication is undertaken in 3.1  
days (median values for papers published in this journal in  
the second half of 2025).
