

Special Issue

Technological Advances in Seed Quality

Message from the Guest Editors

Seed science plays a key role in increasing the sustainability of agricultural activities and conserving ecosystems that are under threat, particularly from climate change. Significant technological advances are gaining ground in agriculture, promoting increased food security alongside global efforts to increase the efficient use of natural resources. In this context, seeds are the main means of transferring technology to agriculture and providing food and raw materials that are essential for the survival of humanity. Thus, seed quality is fundamental to high agronomic performance and the maintenance of biodiversity. This Special Issue of *Seeds*, "Technological Advances in Seed Quality", aims to disseminate unpublished research on technologies and the molecular, physiological, and genetic mechanisms that govern the quality of seeds of species that are important for the economy and biodiversity.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Seeds* (ISSN 2674-1024). *Seeds* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on seed science. The scientific community and the general public can access the content free of charge as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. José Antonio Hernández Cortés
Group of Fruit Biotechnology, Department of Fruit Breeding, CEBAS-
CSIC, P.O. Box 164, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Journal Rank:

CiteScore - Q2 (Agricultural and Biological Sciences (miscellaneous))
