Process Technologies for Polymer-Based Sensor Systems

Guest Editors:

Prof. Dr. Sven Achenbach

Department of Electrical and
Computer Engineering, University
of Saskatchewan, 57 Campus
Drive, Saskatoon, SK S7N 5A9,
Canada

Prof. Dr. Wenjun (Chris) Zhang

Department of Mechanical
Engineering, University of
Saskatchewan, Saskatoon, SK
S7N 5A9, Canada

Deadline for manuscript
submissions:

closed (31 January 2024)

Message from the Guest Editors

Miniaturized sensors, which are increasingly deployed as parts of connected networks and smart systems, contribute indispensable roles for solving societal needs in, e.g., healthcare, communication, and transportation. This development substantially increases the number of required sensors and their performance characteristics, and hence the requirements on sensing technologies, applied materials, and acceptable tolerances. Polymer-based sensors afford a range of advantages for such applications, including tunable material properties and surface interaction. Most importantly, they are compatible with a broad variety of fabrication technologies from the macroscopic down to the nanometer domains, including classical subtractive patterning, emerging additive processes, and mass replication. For functional or auxiliary functions, polymers are often integrated into multi-material sandwiches or composites. This breadth of processes and materials offers both outstanding opportunities for advanced sensing applications and challenges for technological implementation. The aim of this Special Issue is to give readers an overview of innovative techniques in this rapidly evolving field.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
