Message from the Guest Editors

The topics covered in this Special Issue will include both recent advances in gas recognition and improvements in the practical application of electronic noses. Original research articles are welcomed from a broad diversity of disciplines, such as engineering, computer science, machine learning, medicine, analytical science, environmental science, sensors technologies, and chemometrics, to highlight the latest developments in the topic of gas recognition with electronic noses.

This Special Issue will cover, but is not limited to, the following topics:

- Gas recognition for electronic noses;
- Chemometrics, pattern recognition, and machine learning for e-nose instruments;
- Electronic nose application solutions;
- Tools and workflows for preprocessing e-nose raw data.
