Technology, Department of
Systems Engineering, Saarland
University, 66123 Saarbrücken,
Germany

Dr. Carmen Bax

Department of Chemistry,
Materials and Chemical
Engineering "Giulio Natta",
Politecnico di Milano, Milan, Italy

Deadline for manuscript
submissions:

closed (14 June 2024)

Message from the Guest Editors

Dear Colleagues,

The detection and quantification of volatile organic compounds (VOCs) using smart sensor systems represent cutting-edge technologies. Inspired by the human olfactory system, instrumental odour monitoring systems (IOMS), which often use sensor arrays, are used to detect and identify a wide range of volatile organic compounds by analysing their unique VOC profile.

The innovative approaches of smart sensor systems have found applications across various industries, including environmental monitoring, healthcare, food quality control, and security. These devices offer numerous advantages, such as real-time monitoring, high sensitivity, improvements in selectivity and the ability to rapidly identify complex mixtures of VOCs and selectively quantify single VOCs in them. They have proven invaluable in detecting pollutants, diagnosing diseases and drug monitoring via breath analysis, and ensuring the safety of confined spaces. As the field of smart sensor systems continues to advance, it holds great promise for enhancing our ability to detect and manage VOCs in diverse settings, ultimately contributing to improved environmental protection and public health.

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
