Academy of Sciences,
Changchun 130102, China

Deadline for manuscript
submissions:

closed (20 December 2023)

Message from the Guest Editors

Dear colleagues,

A combination of the increasing volume of high and very high resolution earth observation (EO) data available in an open access format; the significant progress made in terms of storage, management, processing and analysis of this information; and the advances in machine learning (such as artificial intelligence) tools has led to progress in the wetland mapping of various wetland classes using various scales of EO technologies.

Potential topics include but are not limited to:

- Application of big data on wetland inventories, evaluation and management.
- New algorithms, indicators and tools for wetland mapping.
- Development of new wetland-related datasets at local and regional scales.
- Wetland thematic mapping (surface water/mangroves/ coastal) related to reporting obligations, such as Ramsar or the SDG indicator 6.6.1 "Extent and trends of water-related ecosystems".

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (Instrumentation)
