Affective and Immersive Human Computer Interaction via Effective Sensor and Sensing (AI-HCIs)

Guest Editors:

Dr. Jinchang Ren

Dr. Pourya Shamsolmoali

Dr. Maher Assaad

Dr. Meijun Sun

Message from the Guest Editors

Human–computer interactions (HCI) are crucial for user-friendly interactions between human users and computer systems, which can be different from a conventional computer, and may appear to be a (portable) hardware device or a software package.

Deadline for manuscript
submissions:
closed (31 January 2019)

In this Special Issue, we aim to provide a forum for colleagues to report the most up-to-date results of developed models/algorithms/approaches/techniques, as well as comprehensive surveys of the state-of-the-art in relevant fields. Both original contributions with theoretical novelty and practical solutions for addressing particular problems in HCI are solicited. Rather than reporting the results of HCI in particular applications, questions such as “how, why and when” should be answered when applying relevant HCI techniques in a specific context.

- Effective models and algorithms for HCI
- Emerging sensing techniques for HCI
- Systematic design and solutions for multimodal fusion in HCI
- Brain–computer interaction
- HCI for human–robot interactions
- Novel applications and case studies for gaming, education, healthcare, etc.

Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
