### Message from the Guest Editors

The year 2021 marks the 10th anniversary of the Section “Sensor Networks” in the journal *Sensors*. We have published more than 4000 papers and have more than 140 Section Board Editors. We are extremely grateful to all the scholars who have over the years contributed to the section’s success for their time and effort.

We would like to take this opportunity to celebrate the ten years of the Section “Sensor Networks” with this Special Issue, which will collect high-quality reviews and articles.

We invite submissions of original papers capable of looking ahead in the next ten years. At the same time, we believe it of strategic importance to examine the most significant recent achievements in the field. Thus, we invite review articles on the most influential technologies in the field, which represent the basis of current “sensor networks” applications today.

The Special Issue covers wide hot topics related to Sensor Networks. We are pleased to invite you to submit your manuscripts. Both comprehensive reviews (preferred) and original research articles are welcomed.

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits
