Message from the Guest Editors

Dear Colleagues,

At present, it is difficult for most countries along the "Belt and Road" to use their own independent space observation capabilities to monitor and evaluate the ecological environment, such as vegetation, water resources, and atmosphere. Therefore, it is urgent to use remote sensing data resources and technologies, jointly with the "Belt and Road" countries to carry out the sustainable development of remote sensing technology and application research. This Special Issue focuses on "Remote Sensing Technology supporting the 'Belt and Road' Sustainable Development". Potential topics include but are not limited to the following:

- Advances in Remote Sensing Data Processing;
- Land cover remote sensing;
- Vegetation and ecological remote sensing;
- Atmospheric remote sensing;
- Remote sensing of water and carbon cycle;
- Remote sensing applications;
- Remote sensing assessment about the "Belt and Road" region of the comprehensive status

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
