Message from the Collection Editors

This Special Issue aims to highlight advances in biometric sensing as this relates to biometric recognition. MDPI's *Sensors* solicits paper submissions and aims to bring together researchers and application developers on any of the critical issues involved. This Special Issue will cover a wide range of topics including works on new approaches to biometric sensing, multimodal sensors, biometric sensors' performance assessment, as well as new concepts for vulnerability detection.

Keywords:

- biometric sensors
- biometrics modality
- biometric recognition
- face sensing
- vascular sensors
- multispectral biometrics
- anthropometrics
- fingerprint sensing
- liveness sensing
- counter spoofing detection

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
