

## Collaborative Sensor Networks and Advanced Data Analytics for Urban Emergencies and Disaster Relief Efforts

Guest Editors:

**Dr. Sergio F. Ochoa**

Computer Science Department,  
University of Chile, Santiago,  
Chile

**Prof. Dr. Weiming Shen**

1. National Research Council of  
Canada, Ottawa, ON, Canada  
2. Department of Electrical and  
Computer Engineering, University  
of Western Ontario, London, ON,  
Canada

**Dr. Roc Meseguer**

Polytechnic University of  
Catalonia, Department of  
Computer Architecture,  
Barcelona, Spain

Deadline for manuscript  
submissions:

**closed (23 September 2019)**

### Message from the Guest Editors

Every year the population density in cities increases and becomes more and more dependent on supporting systems (e.g., electricity, water, transportation, communication networks) which are steadily growing into complexity and interconnections. Therefore, when natural or human-made hazardous events hit urban areas, the consequences on the civilians is high, and the response and recovery processes are complex and expensive. In these scenarios, the effectiveness of the preparedness and response activities play a key role to mitigate the impact of these events. The research work in disaster management has identified the ICT technology and collaborative work as key pieces to conceive solutions that help address urban emergencies and disaster relief efforts.

This Special Issue aims at covering the state of the art and advancements in technologies, processes, and IT solutions that improve the strategies available to address preparedness, response, recovery, and learning from extreme events affecting urban areas.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
