Advanced Application of Eddy Current Sensors, Devices and Systems

Guest Editors:

Dr. Xiaobai Meng

Faculty of Art, Science and
Technology, University of
Northampton, Northampton NN1
5PH, UK

Dr. Mingyang Lu

School of Electrical and
Electronic Engineering, University
of Manchester, Sackville Street
Building, Manchester M13 9PL,
UK

Deadline for manuscript
submissions:

closed (20 August 2023)

Message from the Guest Editors

As one of the most used EM NDT techniques for the evaluation of metals, ECT plays an important role in numerous industries, particularly in the rail, aerospace, petrochemical, nuclear, and transportation sectors. Applications of ECT include the detection of surface or near-surface defects, measurement of thickness, electrical conductivity, and magnetic permeability of austenitic and ferromagnetic metals.

Conductive samples affect the electromagnetic field generated by coils with alternating induced currents. Referring to eddy current effects, materials with different properties (for example, magnetic permeability, electrical conductivity, thickness) result in different secondary electromagnetic fields and induced voltages on coils. Based on this fact, various methods have been developed to interrogate conductive samples using eddy current sensors.

The SI welcomes contributions from but is not limited to the following fields: applied eddy current sensors; eddy current non-destructive testing; pulsed eddy current testing (PECT), multi-frequency eddy current testing (MECT), real-time defect detection, evaluation of metallurgical property, novel ECT probe design, etc.

Special Issue

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
