## Sensing and Mobile Edge Computing

Guest Editor:

**Dr. Hai Dong**

School of Computing  
Technologies, RMIT University,  
Melbourne, VIC 3000, Australia

Deadline for manuscript  
submissions:

**30 September 2024**

### Message from the Guest Editor

In order to keep up with the rapid pace of human life, sensing technology integrated with wireless networks has to overcome many issues regarding communications (e.g., short communication range, security, privacy, reliability, mobility, etc.), and resources (e.g., power considerations, storage capacity, processing capabilities, bandwidth availability, etc.). As a promising edge technology, mobile edge computing (MEC) is seen as the solution for this. On the one hand, mobile edge computing provides an IT service environment and cloud computing capabilities at the edge of the mobile network, within the radio access network (RAN) and in close proximity to mobile subscribers. On the other hand, MEC connects the user directly to the cloud service-enabled edge network. Deploying MEC at the base station enhances computation and avoids bottlenecks and system failure. In addition, recently, artificial intelligence (AI) is undergoing a sustained success renaissance as it can substantially improve networks' cognitive performance and intelligence, thereby contributing to fully unleashing the potential of big data.

**Special** Issue

# sensors

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access :** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
