### Message from the Guest Editors

The Industrial Internet of Things (IIoT) has now become a reality in the context of industrial transformation. It is becoming increasingly more pervasive in the industry as digitization is becoming a business reality for many organizations in some of the most trending sectors, such as health, agriculture, manufacturing, logistics, oil and gas, energy, and other utilities. This has compelled scientists and researchers to contribute more to advanced techniques in the field of distributed computing, integrated artificial intelligence, data mining, data aviation, machine learning, M2M communication, and many more. In this Special Issue, we aim to bring together academic and industrial researchers to explore the opportunities of IIoT for upcoming various domains and to focus its impact on the solutions of the aforementioned challenges and propose feasible solutions.

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
