Message from the Guest Editor

This Special Issue will present both review and original research articles related to application of graph signal processing (GSP) tools to various sensor data analysis tasks, including sensor data classification, clustering, anomaly detection, and prediction. The Special Issue is open to both theoretical contributions and applied articles addressing time-series signals as well as image, video, and heterogeneous signals.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
