closed (15 December 2018)

Message from the Guest Editors

Dear Colleagues,

The Internet of Things (IoT) is leading to a new dimension of the Internet. IoT is driven by the integration and unification of all communication systems located around us. Thereby, the systems can provide ubiquitous communication and computing with the purpose of defining a new generation of services. The Internet of Things is a key enabler for the realization of new Smart-* realm (Smart Cities, Smart Buildings, Smart Factories, Smart Agriculture, Smart Mobility, etc.) as it allows for pervasive interaction with/between smart things, leading to an effective integration of information into the digital world. The aim of this Special Issue is to include selected papers from the 2018 Global IoT Summit (GloTS) <http://www.globaliotsummit.org/>, held 4–7 June, 2018, in Bilbao, Spain, describing research from both academia and industry and technical presentations on the recent advances in theory, application and implementation of Internet of Things concepts and IoT technologies and applications for the benefit of society.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
