Message from the Guest Editors

This Special Issue focuses on the operation of sensors on the Internet of Things, with particular emphasis on their storage, processing, and protection when sending or sharing information.

Intelligent systems for the Internet of Things are based on sensors that acquire knowledge from environment. The main idea behind this Special Issue is to take up the topic of security and information processing of data obtained by these sensors, which are used in solutions in intelligent homes/cities or even in the Internet of Medical Things.

- biomedical sensors
- big data
- Internet of Things
- machine learning
- multiagent systems
- augmented/virtual/mixed reality

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
