Internet of Mobile Things and Wireless Sensor Networks

Guest Editors:

Prof. Dr. Vladimir M. Vishnevsky

Department of Information and Networking Technologies,
Institute of Control Sciences of Russian Academy of Sciences, 65 Profsoyuznaya Street, 119991 Moscow, Russia

Prof. Dr. Arkady Zaslavsky

School of Information Technology, Deakin University, Burwood, VIC 3125, Australia

Deadline for manuscript submissions:

closed (20 July 2024)

Message from the Guest Editors

Dear Colleagues,

The Internet of Things involves adding digital sensors and networking technologies to the devices and systems that we use every day in the analog world, transforming and digitizing it and thereby making everything connected. The exponential growth of smart devices and technologies has allowed humankind to be in constant communication. As the flagship of the fourth industrial revolution (Industry 4.0) technologies, IoT enables on-site measurements to be taken remotely and in real time.

IoT and the trend toward greater connectivity means a significant increase in the number of data collected from more sources to enable real-time decisions, increase revenue, productivity, and efficiency and deliver new and improved solutions and services to all stakeholders. This raises a large number of network issues, open technical problems, and challenges related to performance, modeling, maintenance, reliability, and security.

Prof. Dr. Vladimir M. Vishnevsky

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
