Internet of Things in Healthcare: Applications, Infrastructures and Smart Systems

Guest Editor:

Dr. Agostino Forestiero

Institute for High-Performance Computing and Networking, National Research Council of Italy, 87036 Cosenza, Italy

Deadline for manuscript submissions:

closed (31 August 2021)

Message from the Guest Editor

Dear Colleagues,

Innovative and revolutionary healthcare services and applications have been made possible thanks to the great success of the Internet of Things (IoT) paradigm. A myriad of sensors in our life environment also enable the capturing of non-stop and real-time health information of an individual and their related behavior—information that. often in an aggregated manner, can be exploited for monitoring, treatments, and interventions in real-time. Starting from smart wearable or implantable sensors to remote monitoring of elderly, medical device networking, it is possible, in general, to create network infrastructures, innovative applications, and pervasive environments to monitor patient health and safety, as well as improve how physicians deliver care. This Special Issue focuses on the design, development, performance evaluation, experimentation of innovative IoT enabling technologies in healthcare applications. Novel IoT applications leveraging deep and machine learning concepts in healthcare are also aims of this Special Issue.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1
