Message from the Guest Editors

Dear Colleagues,

Remote sensing technologies have provided major advances to our understanding of the atmosphere and climate systems, as well as their changes. The aim of this Special Issue is to collect new research and developments in the field. We welcome original contributions in order to present current research trends in this collection. Topics of interest include the following:

- remote sensing of the atmosphere;
- remote sensing of oceans, land, snow, and ice;
- environmental change;
- land cover/land use;
- earth observation.
