Message from the Guest Editors

Dear Colleagues,

The widespread diffusion and global popularity of mobile devices (e.g., smartphones, tablets, single board computers, etc.) has significantly changed the market, making them extremely attractive as enablers of an endless number of always-connected applications and services. Their extended sensing capabilities, combined with a dramatic improvement in their performance, have fostered new services that take full advantage of the huge amount of heterogeneous data sensed and collected, such as audio, video, motion, and geo-related information. Moreover, in the Internet of Things the role of mobile devices will be even more centric, as they will also serve as entry points to IoT applications by users and thus become the link between people and things.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
