Intelligent Mobile and Wearable Technologies for Digital Health

Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses primarily on wearable technology, which includes novel materials and sensors for electronic textiles or other wearable devices. We aim to improve individuals’ health and help them to lead healthier lives. Potential topics include but are not limited to the following:

- Wearable technology;
- Mobile health technology;
- Wearable sensors;
- Soft wearable robotics;
- Wearable smart devices;
- Biomedical wearable technology;
- Biomedical and mobile health;
- Sensors for electronic textiles;
- Body sensor networks;

Deadline for manuscript submissions:
closed (31 May 2024)
**Message from the Editor-in-Chief**

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

**Author Benefits**

- **Open Access**: free for readers, with article processing charges (APC) paid by authors or their institutions.
- **High Visibility**: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
- **Journal Rank**: JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
