Recent Advancements in Radar Imaging and Sensing Technology

Message from the Guest Editors

The aim of this Special Issue is to gather the latest research results in the area of modern radar technology using active and/or radar imaging sensing techniques in different applications, including both military use and a broad spectrum of civilian applications. Contributions from leading experts in this field of research will be collected and presented in this special journal issue.

This Special Issue aims to highlight the advances in the radar imaging and sensing technology. Topics include, but are not limited to:

- High Resolution Radar Imaging
- Novel SAR and ISAR Imaging Techniques
- Passive Radar Imaging Technology
- Modern Civilian Applications of Using Radar Technology for Sensing
- Multiband and/or Multistatic Radar Imaging
- Novel Fusion Techniques in Radar Technology
- Multiband and/or Multistatic Radar Sensing
- Multifunction Radar Sensing

Deadline for manuscript submissions: 31 October 2019
Message from the Editorial Board

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Ei Compendex, Inspec (IET) and Scopus.

CiteScore 2017 (Scopus): 3.23; ranked 9/116 in 'Physics and Astronomy: Instrumentation' and 100/644 in 'Electrical and Electronic Engineering.'
