submissions:

closed (10 July 2023)

Message from the Guest Editor

Dear Colleagues,

The expectation in the field of mobile robots is the continuous revision and improvement of the classical designs and the development of new breakthrough ideas and concepts ready to implement new functionalities and applications in a highly unstructured real world. The application of sensors and signal processing techniques either as a part of a mobile robot or as a fundamental part of a device of a mobile robot is driving this continuous evolution.

In this direction, the aim of this Special Issue is to highlight new advances in the field of mobile robots based, directly or indirectly, on the application of sensing concepts and methodologies.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
