Smart Sensing Technologies for Agriculture

Message from the Guest Editors

Dear Colleagues,

You are invited to submit a manuscript for the upcoming Special Issue on Smart Sensing Technologies for Agriculture. In this issue, we intend to assemble descriptions of cutting-edge research on the development of new and exciting sensing technologies applied to agricultural crops, animals, soil, water, air, machinery, and other elements of modern food and biomaterials production systems. In particular, we expect to include quality sensor development research that will be presented at the Fi2h Global Workshop on Proximal Soil Sensing and the 2019 Pedometrics meetings later this year. The Sensors journal maintains a relatively high impact factor and facilitates open access to published scholarly work. Please do not hesitate to ask any questions and pledge to make a submission of a manuscript pertaining to relevant research that is currently at its final stage.

- Precision agriculture
- Proximal soil sensing
- Crop phenotyping
- Precision livestock management
- Machine vision in agriculture

Deadline for manuscript submissions: 20 August 2019

Message from the Editorial Board

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Ei Compendex, Inspec (IET) and Scopus.

CiteScore 2017 (Scopus): 3.23; ranked 9/116 in 'Physics and Astronomy: Instrumentation' and 100/644 in 'Electrical and Electronic Engineering.'
