Message from the Guest Editors

Dear Colleagues,

Smart cloud computing technology has been developed rapidly recently, with the acceleration of Internet of Things (IoT) technology and artificial intelligence (AI) technology. We have entered an era in which cloud-based systems are given the "smart" property that can meet giant demands in multiple fields, from tele-health to e-learning, from vehicular systems to mobile applications. In this Special Issue, we aim to collect recent academic achievements in novel techniques of the most advanced smart cloud computing aligned with other novel technologies, such as IoT, AI, and big data technologies.
