Deadline for manuscript submissions: closed (30 September 2022)

#### Message from the Guest Editors

Dear colleagues,

Social robots are getting ubiquitous, posing growing pressure on the robotics community to deliver these artificial entities able to play interesting roles in society. Robot skills are, slowly but surely, approaching humans', i.e., to mimic and further extend humans' typical skills. Hence, in addition to sensing matching human senses, there is a drive to develop novel sensors and processing techniques for the data produced.

The challenges for the sensors community are huge, ranging from materials to operation principles, mathematical models, sensor fusion, perception, and artificial intelligence, as well as hardware and software aspects. In addition, networked social robotics extends the possibilities of sensor architectures. Sensor uncertainties may even remain in the background of those intrinsic to social concepts, not affecting prospective robot skills. The importance of sensing in the context of social robots is thus clear.

#### Message from the Editor-in-Chief

#### **Prof. Dr. Vittorio M. N. Passaro** Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## **Author Benefits**

**Open Access :** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
