Message from the Guest Editor

Dear Colleagues,

Temperature sensors play an important role in industry and research field, such as in controlling process temperatures, chemical reactions, and also for use in agriculture. Other important applications of temperature sensors include body tissue temperature measurement. Accurate measurement of localized temperature changes is important in understanding the thermal phenomena of homeostasis and realizing future sophisticated health diagnostics. For such a reason, temperature sensors are integrated into wearables electronics to monitor body temperature.

The aim of this Special Issue is to cover a wide range of topics, including materials, fabrication process, mechanisms, and applications of temperature sensors for improving human life.

Both review articles and original research papers relating to temperature sensors are welcome.

Dr. Tomoyuki Yokota

Guest Editor

Deadline for manuscript submissions:
31 March 2019
Message from the Editorial Board

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), *Ei Compendex, Inspec (IET)* and *Scopus*.

**CiteScore 2017** (Scopus): 3.23; ranked 9/116 in 'Physics and Astronomy: Instrumentation' and 100/644 in 'Electrical and Electronic Engineering.'
