Electronic Engineering, The  
University of Melbourne,  
Melbourne, VIC 3010, Australia

**Prof. Dr. Andrey  
Miroshnichenko**

School of Engineering and  
Information Technology,  
University of New South Wales  
Canberra, Northcott Drive,  
Campbell, ACT 2600, Australia

### Message from the Guest Editors

The rapid development of microwave non-destructive testing and evaluation (NDT&E) of materials and structures has increased the demand for improved microwave measurement methods and techniques. The use of ultra-wideband (UWB) measurement systems is of particular interest for civil engineering applications as it can detect defects and damages in construction materials and composite structures using imaging methods and techniques. The development of UWB high-gain Vivaldi array antennas for these systems with proper dimensions and high performance is one of the major challenges. The success of applying the UWB microwave technique is dependent on the operating frequency utilized for specified material under test.

Deadline for manuscript  
submissions:

**closed (30 September 2022)**

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
