Message from the Guest Editors

Dear Colleagues,

Mobile edge computing focuses on sinking service platforms with computing, storage, and communications capabilities to the edge of the network, and require that mobile users offload their computationally intensive tasks to the mobile edge computing facilities. Mobile edge computing emphasizes proximity to mobile users in order to reduce latency in network operations and service delivery. Although mobile edge computing can fulfill the high computational requirements of users, it takes more energy and delay to offload tasks to the server. To better utilize the advantages of mobile edge computing, some methods are needed to reduce the delay and energy consumption. this Special Issue encourages authors from academia and industry to submit original research papers related to advanced technological innovation for mobile edge computing and wireless communication networks.

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
