Message from the Guest Editors

Dear Colleagues,

In recent years, the study of human movement and posture has been a major focus for many researchers. Nowadays, it is increasingly common to find new sensors that allow us to study human movement more precisely. Among other advantages, these solutions have the ability to be flexible, as they can be customized and adapted to each specific case under study.

This Special Issue is dedicated to the study of human posture and movement, especially research that includes the use of sensors which allow for more precise quantification of human locomotion.

4, 70126 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
