Message from the Guest Editors

Dear Colleagues,

Low-power WANs have become a hot topic for M2M and IoT applications in recent years. This happened thanks to low-power consumption, secure data transmission and advanced protocols for wireless sensor networks. We expect energy efficient cellular networks in coming generations (5G) and ecological concerns along with economic issues lead to the evolution of new technologies for green communications in cellular networks. In this matter, energy harvesting and the capabilities of wireless sensor nodes to harvest energy is a promising way to achieve green communication.

This Special Issue will especially cover aspects of energy harvesting, green communication, low-power WANs, IoT, M2M, and related issues (Selected extended papers from [WMNC 2018](#) and [INCoS 2018](#)).

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and
Information Engineering,
Politecnico di Bari, Via Orabona
4, 70126 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
