### Message from the Guest Editors

This Special Issue encourages authors to submit their research and contributions about the use and application of wearable sensors for gait assessment and analysis.

The main topics for this issue include, but not limited to:

- Validity analysis of novel wearable sensors for human locomotion.
- Reliability analysis of wearable sensor.
- New applications and uses of metrics provided by wearable sensors in training, competition and injury management settings.
- Novel technologies applied to gait analysis.
- State of the art for wearable devices.
- Algorithms, integrations with other platforms or software, signal processing, and bigdata obtained by wearable sensors.
