Message from the Guest Editor

Dear Colleagues,

The aim of this special issue is to provide the latest findings of the current research in Acoustic Sensors, special addressing the improvements in the sensors design and technology fields, for innovative application in gas and liquid ambient. Authors are invited to present the advanced research trends in acoustic wave sensors technology for operation under extreme conditions (high temperature, high pressure, and caustic ambient).

The Special Issue will publish those full research, review and high rated manuscripts addressing the advances in design, fabrication, modeling, testing and characterization of cost-effective, small and high performance acoustic wave sensors.
