Message from the Guest Editors

This Special Issue welcomes contributions from a broader domain of IoT-enabled blockchain-driven solutions. Internet of Things (IoTs) technologies are becoming an integral part of our daily life due to the proliferation of different types of Internet-enabled devices. Managing the massive amount of data generated by these devices in an efficient, secure, and economical way is a challenging task. Recently, blockchain has been perceived as a promising technique that can be used to build trust without the need of a trusted third party. The convergence of blockchain and IoT can provide a secure and robust mechanism of managing data generated by IoT devices.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
