Message from the Guest Editor

This Special Issue addresses cutting-edge technologies designed to support healthcare interventions to detect, estimate the risk of falls, predict, and/or prevent falls, or to reduce their consequences. The Special Issue welcomes submissions describing the application, technologies, and/or validation of innovative approaches, in areas including:

- Sensor-based feedback on balance/sway to patients and/or care providers;
- Body-sensor networks
- Sensor-based detection of falls and fall risk assessment;
- Technological methods for risk/fall prediction;
- Reliability and validity of risk/fall predictions;
- Cost effectiveness of technologies for preventing falls
- Fall prevention

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
