### Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on new developments of technology in flexible sensor and electronics, such as display components by means of new materials, new device structure, and operation system techniques. The sensor would specially focus on gas, chemical, bio-signal, biomaterial, and biometric images. Furthermore, papers introducing new characterization and real-time monitoring methods in a variety of fields will enrich this Special Issue. We would like to invite original research articles as well as review articles that contain theoretical, analytical, and experimental investigations covering all aspects of advanced flexible sensors and electronics.
