Message from the Guest Editors

This Special Issue will include selected papers from the 26th International Conference on System Theory, Control and Computing (ICSTCC 2022), to be held in Sinaia, Romania, 19–21 October 2022.

The International Conference on System Theory, Control and Computing—ICSTCC 2022—aims at bringing together, in a unique forum, scientists from academia and industry to discuss the state of the art and new trends in system theory, control and computer engineering, as well as at promoting professional interactions and fellowships.

The papers considered for ICSTCC 2022 cover the general areas of automation and robotics; computer science and engineering; and electronics and instrumentation.

The authors of selected papers from ICSTCC 2022 will be invited to submit extended and enhanced versions of their papers to this Special Issue.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
