IoT Technologies and the Agricultural Value Chain

Message from the Guest Editors

The agricultural value chain is increasingly complex as it involves numerous activities in growing systems, production planning, handling and markets. IoT implementation presents some benefits to the different actors and activities along the supply and value chain in terms of improved resource use, less waste, better data access and sharing, synchronization, reduced storage and cost, and enhanced consumer information access. Intensive use of ICT involving a large amount of data, intelligent and soft or virtual sensors, control loops, communication networks, storage and cloud services. As such, new business models and value propositions are necessary to reflect and leverage improved processes and products and the overall transformation of agri-food activities through IoT.

Papers included in this Special Issue will address the following areas:

- IoT systems development; Precision farming; System integration and interoperability; Data models; IoT networks; Intelligent sensors; IoT sensors; Visualization interfaces; Decision support systems and data-driven decisions; Virtual–soft sensors; IoT-based business models; Data sharing; IoT-based control systems; Robotics; Mechatronics

Deadline for manuscript submissions:
30 December 2019
Message from the Editorial Board

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

**Open Access**: free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility**: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), *Ei Compendex, Inspec (IET)* and *Scopus*.

**CiteScore 2017** (Scopus): 3.23; ranked 9/116 in 'Physics and Astronomy: Instrumentation' and 100/644 in 'Electrical and Electronic Engineering.'
