Modeling and Measurements of Propagation Environments for 5G and beyond Networks

Message from the Guest Editors

5G and beyond networks will be based on millimeter-wave and terahertz bands. The emerging systems also use lower microwave ranges. The development of propagation and channel models for designing and planning the new emerging wireless networks is important. This Special Issue covers topics related to new and emerging technologies in communication systems and networks, focusing on channel modeling and propagation measurements on 5G networks and beyond. Topics of interest include but are not limited to the following:

- Channel modeling for cellular, IoT, V2X, satellite networks, BANs, WSNs, MANETs, etc.;
- Propagation measurements in the range of centimeter, millimeter, and terahertz waves;
- Novel estimation methods of current channel state;
- Accuracy and error conditioning;
- Channel models in systems;
- Machine learning and artificial intelligence algorithms;
- Analytical, geometric, statistical, stochastic, or deterministic approaches to modeling stationary or time-varying channels;
- Building of electromagnetic situation awareness in cognitive radio networks;
- Designing, spatial planning, and modeling the emerging and future wireless networks.
**Editors-in-Chief**

Prof. Dr. Assefa M. Melesse  
Dr. Alexander Star  
Prof. Dr. Mehmet Rasit Yuce  
Prof. Dr. Eduard Llobet  
Prof. Dr. Guillermo Villanueva  
Prof. Dr. Vittorio M.N. Passaro  
Dr. Davide Brunelli  
Dr. Raffaele Bruno

Prof. Dr. Mengdao Xing

**Message from the Editorial Board**

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

**Author Benefits**

**Open Access**: free for readers, with article processing charges (APC) paid by authors or their institutions.  
**High Visibility**: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, Ei Compendex, Inspec, and many other databases.  
**Journal Rank**: JCR - Q1 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
