### **Message from the Guest Editors**

Dear Colleagues,

The recent advances in optical sources and detectors have opened up new opportunities for sensing and imaging techniques and biomedical and healthcare applications. This Special Issue of *Sensors*, entitled "Optical Methods in Sensing and Imaging for Medical and Biological Applications", will focus on all aspects of the research and development related to these areas.

Original research papers that focus on the design and experimental verification of new sensors and imaging system operating in optical spectra, as well as papers that focus on their testing for biomedical and clinical applications, are welcome.

Both reviews and original research articles will be published. Reviews should provide an up-to-date, well-balanced overview of the current state-of-the-art in a particular application and include main results from other groups.

We look forward to, and welcome, your participation in this Special Issue.

Dr. Dragan Indjin,

Dr. Željka Cvejić

Dr. Małgorzata Jędrzejewska-Szczerska

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
