Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Sensors* entitled "Printed Electrode Sensors and Biosensors" will include original research and review articles in the field of sensors and biosensors based on electrodes developed using printing technology in the main aspects, including the design, materials employed and the molecular architecture, and the fabrication process, as well as their morphological and electrochemical characterization and application in sensing and biosensing. It will highlight the importance of this type of sensor and the advances in the field, as well as applications in the detection of a different kind of bioactive compound. It will offer an opportunity for scientists to publish their novel studies related to sensors based in printing technology.

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
