Deadline for manuscript
submissions:

closed (10 September 2024)

Message from the Guest Editors

Dear Colleagues,

In radar signals recognition and identification theory, the main task is to set distinctive patterns of such signals and work out methods for distinguishing them.

This Special Issue aims to highlight advances in radar signal recognition and identification. Topics include but are not limited to:

- Modern solutions in radar signal detection, recognition and identification;
- Specific radar emitters identification;
- New technologies in the process of features extraction in radar signals;
- Classification methods and data particle divide;
- New technologies in radar signal and data processing;
- Application of artificial intelligence to radar signal detection, recognition and identification;
- Countermeasures to modern radar and ELINT systems;
- Civilian and military applications of modern radar technology in electronic warfare.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
