Message from the Guest Editors

A Special Issue in these areas will be published in the *Sensors* journal in an effort to diffuse current advances of various robotics and automation technologies for smart cities. Papers should contain theoretical and/or experimental results and will be subject to formal review procedures.

The particular topics of interest include but are not limited to:

- Robotic sensing systems for smart cities or civil infrastructure;
- Bio-inspired sensing for smart cities or civil infrastructure;
- IT and robotics for construction automation or construction management;
- Structural health monitoring or inspection using robotics technologies;
- Mobile sensor networks for smart cities or civil infrastructure;
- Damage repair and emergency handling control for smart cities or civil infrastructure;
- Service robots and robotized devices for built environment.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
