Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to provide a comprehensive overview of state-of-the-art applications, numerical and theoretical developments of sensing techniques within the context of assessment, and health monitoring of transport infrastructures and construction materials. Sensing systems of interest are related to active and passive sensors, analogue and digital sensors, and ground-based, embedded, and remote sensing systems. Sensors based on acoustic, electrical, electromagnetic, chemical, optical, and radioactive principles are considered, amongst others, in both stand-alone and integrated multi-source operating modes. Hence, papers with a focus on areas including, but not limited to, highways, railways, and airfields, as well as construction materials, are encouraged. Review papers in the above outlined research areas will also be considered.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
