Sensors and Signal Processing for Fault Diagnosis and Failure Prognosis of Means of Transport

Guest Editor:

Prof. Dr. Tomasz Figlus

Faculty of Transport and Aviation Engineering, Silesian University of Technology, 8 Krasinskiego Street, 40-019 Katowice, Poland

Deadline for manuscript submissions: closed (31 December 2022)

Message from the Guest Editor

Dear Colleagues,

I invite you to submit to a special issue of the Sensors journal entitled "Sensors and Signal Processing for Fault Diagnosis and Failure Prognosis of Means of Transport". Means of transport are required to exhibit high reliability and comfort of use. Vibration and noise signals of means of transport are valuable information about their technical condition. The use of different sensors and measurement methods as well as advanced signal processing methods enable early detection of wear and faults to means of transport. All this increases reliability and extends their failure-free operation, as well as allows scheduling repairs in advance. The development of measuring methods and equipment should be geared towards fast measurement in stationary and non-stationary operating conditions, even in hard-to-reach places. The signal recorded in this way requires advanced processing to be carried out in order to diagnose the damage occurring and to enable further prognosis. Improvement of existing solutions and development of new sensors, measurement methods and signal processing methods are the challenges and specific problems of the research work undertaken.

Message from the Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
